

Thabang Norman Lesotho

Helpdesk Simulation — OneNote Documentation Portfolio

Candidate	Thabang Norman Lesotho
Programme	CAPACITI Tech Career Accelerator (in partnership with CX Experts)
Simulation	2-Week Individual Helpdesk Simulation — Anchor Tech Mindz (Zendesk)
Role played	Frontline IT Support Technician
Scenario groups	Microsoft 365 & Common Helpdesk Issues Network & Performance Support
Tickets documented	5 resolved tickets across both scenario groups
Documentation tool	Microsoft OneNote

This document compiles screenshots from a OneNote notebook used to plan, investigate, and document IT support tickets during the Helpdesk Simulation phase of the CAPACITI Tech Career Accelerator. OneNote was used as a working notebook to structure each ticket by scenario group, capture the investigation process, and keep evidence in a consistent, review-ready order before the findings were transferred into Zendesk as live tickets.

Notebook Overview

The notebook is organised into three sections: a Portfolio Overview page, a section for Microsoft 365 & Common Helpdesk Issues tickets, and a section for Network & Performance Support tickets. Each ticket page follows the same structure — an issue summary, then an IT Support Technician view covering investigation and findings, troubleshooting steps taken, and the eventual resolution — so that every ticket can be reviewed the same way a real Zendesk ticket would be audited.

The Portfolio Overview page (shown first below) summarises the five completed tickets across the two selected scenario groups, and links to the underlying documentation.

Ticket 1 — OneDrive Sign-In (Question #36)

Scenario group: Microsoft 365 & Common Helpdesk Issues

OneDrive repeatedly prompted the user to sign in; after a successful sign-in the prompt returned and file sync stopped.

Ticket 2 — Teams Offline (Question #38)

Scenario group: Microsoft 365 & Common Helpdesk Issues

Microsoft Teams displayed “You’re offline” despite an active internet connection, and messages/recent conversations stopped updating.

Ticket 3 — No Internet Access (Question #40)

Scenario group: Network & Performance Support

A Dell Latitude 5420 connected to the office Wi-Fi but showed “No internet, secured” — websites, cloud services, Microsoft 365 apps, and other work resources were all unreachable.

Ticket 4 — Websites Not Opening (Question #35)

Scenario group: Network & Performance Support

The user could reach some websites but not Microsoft Teams or SharePoint reliably; the affected laptop showed “This site can’t be reached” while other devices on the same Wi-Fi worked normally.

Ticket 5 — Wi-Fi Disconnects (Question #39)

Scenario group: Network & Performance Support

The laptop repeatedly disconnected from Wi-Fi while other devices on the same network were unaffected, and the laptop stayed connected when tested on a different network.

Portfolio Overview — Five Zendesk Tickets

The landing page of the notebook. It lists the candidate, the two scenario groups selected for the simulation (Microsoft 365 Support and Network Support), and confirms all five tickets were completed. A companion PDF of the full ticket write-ups is attached directly on this page for quick reference.

Figure 1: OneNote page — Portfolio Overview — Five Zendesk Tickets

Ticket 1 — OneDrive Sign-In (Question #36)

Microsoft 365 & Common Helpdesk Issues. The page opens with the issue summary — repeated OneDrive sign-in prompts that reappeared even after a successful login, with sync stopping in the background — before moving into the IT Support Technician view, where the investigation and findings are recorded. Evidence on the page is ordered to mirror a real support workflow: initial report, investigation, troubleshooting, confirmation, and closure.

The screenshot shows a OneNote application window titled 'Thabang Norman Lesotho - Helpdesk Simulation'. The interface includes a top ribbon with 'File', 'Home', 'Insert', 'Draw', 'View', and 'Help' tabs. Below the ribbon is a search bar and a toolbar with various editing tools. The left sidebar displays a navigation pane with a search icon and a list of sections: 'Portfolio Overview', 'M365 - Teams and O...', and 'Network - Wi-Fi and ...'. The main content area is titled 'OneDrive Sign In - Q36' and shows the date and time 'Tuesday, September 15, 2026 10:19 AM'. Below this, a 'TICKET 1' label is followed by the title 'OneDrive Keeps Asking Me to Sign In — Question #36'. A table with two columns, 'Scenario group' and 'Evidence', contains the following information:

Scenario group	Microsoft 365 & Common Helpdesk Issues
Evidence order	Screenshots are arranged from initial report to investigation, troubleshooting, confirmation, and closure.

Below the table, the 'Issue summary' section states: 'The customer reported that OneDrive repeatedly requested sign-in. After signing in successfully, the prompt returned and file synchronization stopped.' The 'IT Support Technician view' section is titled 'Investigation and findings' and begins with the text: 'The issue was reported to OneDrive as the customer's'.

Figure 2: OneNote page — Ticket 1 — OneDrive Sign-In (Question #36)

Ticket 2 — Teams Offline (Question #38)

Microsoft 365 & Common Helpdesk Issues. Documents a case where Teams reported “You’re offline” while the machine had a working internet connection, and messages/conversations were no longer updating. The page carries the same report-to-closure structure used across all five tickets.

The screenshot shows a OneNote application window titled 'Thabang Norman Lesotho – Helpdesk Simulation'. The interface includes a top ribbon with 'File', 'Home', 'Insert', 'Draw', 'View', and 'Help' tabs. Below the ribbon is a search bar and a toolbar with various editing and drawing tools. The left sidebar displays a navigation pane with a search icon and a list of sections: 'Portfolio Overview', 'M365 - Teams and O...', and 'Network - Wi-Fi and ...'. The main content area is titled 'Teams Offline - Q38' and shows the date and time 'Tuesday, September 15, 2026 10:32 AM'. The content includes a 'TICKET 2' header, a title 'Microsoft Teams Showing “You’re Offline” Despite Internet Connection — Question #38', and a table with the following data:

Scenario group	Microsoft 365 & Common Helpdesk Issues
Evidence order	Screenshots are arranged from initial report to investigation, troubleshooting, confirmation, and closure.

Below the table, there is an 'Issue summary' section with the text: 'The customer reported that Microsoft Teams showed “You’re offline” even though the computer was connected to the internet. Messages and recent conversations were not updating.' At the bottom, there is a link for 'IT Support Technician view'.

Figure 3: OneNote page — Ticket 2 — Teams Offline (Question #38)

Ticket 3 — No Internet Access (Question #40)

Network & Performance Support. A Dell Latitude 5420 connected to the office Wi-Fi but was flagged “No internet, secured” — blocking access to websites, cloud services, Microsoft 365 apps, and other work resources. This page begins the Network & Performance Support section of the notebook.

The screenshot shows a OneNote application window titled "Thabang Norman Lesotho – Helpdesk Simulation". The interface includes a top ribbon with "File", "Home", "Insert", "Draw", "View", and "Help" tabs. Below the ribbon is a search bar and a toolbar with various editing and drawing tools. The left sidebar displays a navigation pane with a search icon and a list of sections and pages. The main content area is titled "No Internet Access - Q40" and shows the following content:

Tuesday, September 15, 2026 10:30 AM

TICKET 3

Laptop Connected to Wi-Fi but Showing “No Internet Access” — Question #40

Scenario group	Network & Performance Support
Evidence order	Screenshots are arranged from initial report to investigation, troubleshooting, confirmation, and closure.

Issue summary

The customer reported that a Dell Latitude 5420 connected to the office Wi-Fi but displayed “No Internet, secured.” Websites, cloud services, Microsoft 365 applications, and other work resources could not be accessed.

Figure 4: OneNote page — Ticket 3 — No Internet Access (Question #40)

Ticket 4 — Websites Not Opening (Question #35)

Network & Performance Support. The user could reach some sites, but Microsoft Teams and SharePoint were unreliable, with the laptop showing “This site can’t be reached” while other devices on the same network worked fine — pointing the investigation toward a device-specific rather than network-wide cause.

The screenshot shows a OneNote application window with the title bar 'Thabang Norman Lesotho – Helpdesk Simulation'. The ribbon includes 'File', 'Home', 'Insert', 'Draw', 'View', and 'Help'. The left sidebar shows a navigation pane with sections like 'Portfolio Overview', 'M365 - Teams and O...', and 'Network - Wi-Fi and ...'. The main content area is titled 'Websites Not Opening - Q35' and contains the following information:

Tuesday, September 15, 2026 10:33 AM

TICKET 4

Unable to Access Certain Websites — Question #35

Scenario group	Network & Performance Support
Evidence order	Screenshots are arranged from initial report to investigation, troubleshooting, confirmation, and closure.

Issue summary

The customer could access some websites but could not access Microsoft Teams and SharePoint reliably. The affected Windows laptop displayed “This site can’t be reached,” while other devices on the same Wi-Fi network could access the services normally.

IT Support Technician view

Investigation and Resolution

Figure 5: OneNote page — Ticket 4 — Websites Not Opening (Question #35)

Ticket 5 — Wi-Fi Disconnects (Question #39)

Network & Performance Support. The laptop repeatedly dropped its Wi-Fi connection while other devices on the same network stayed connected, and the laptop itself connected without issue on a different network — narrowing the fault to the device's Wi-Fi configuration rather than the office network.

The screenshot shows a OneNote application window titled 'Thabang Norman Lesotho - Helpdesk Simulation'. The left sidebar contains a table of contents with the following entries:

Thabang Norman Lesotho - Helpdesk Simulation	
+ Add section	+ Add page
Portfolio Overview	No Internet Access - Q40
M365 - Teams and O...	Websites Not Opening - ...
Network - Wi-Fi and ...	WiFi Disconnects - Q39

The main content area displays the title 'WiFi Disconnects - Q39' with a timestamp 'Tuesday, September 15, 2026 10:33 AM'. Below the title is a section labeled 'TICKET 5' followed by the heading 'Wi-Fi Keeps Disconnecting — Question #39'. A table provides details about the ticket:

Scenario group	Network & Performance Support
Evidence order	Screenshots are arranged from initial report to investigation, troubleshooting, confirmation, and closure.

Below the table is an 'Issue summary' section with the text: 'The customer reported that a laptop repeatedly disconnected from Wi-Fi. Other devices on the same Wi-Fi network were not affected, and the laptop remained connected when tested on another network.' At the bottom, there is a link for 'IT Support Technician view' and a watermark for 'Activate Windows'.
